

Sterimiser® -Toolchest T7D

The toolchest T7D is for any business requiring disinfection of tool shared between staff. Sharing tools between staff is essential but users need confidence that the tools are not contaminated from a previous operator or procedure. Often hot water or chemicals are used for this purpose but can pose to many risks, such as scalding or foodstuff contamination.

Traditional toolchests offer no protection against bacteria, mould and virus. Until now....

Benefits

- UVC Technology, Proven technology
- Medical 316 stainless steel locking cabinet
- Waterproof to IP67
- Glass safe
- Locking wheels
- Low energy
- Cool to touch
- 900hrs between servicing

Order Code: STERIT7D

The **Sterimiser® T7D** is a 7 drawer locking toolchest with smooth glide draw runners, designed for the surface disinfection of hand tools and equipment such as spanners, screwdrivers, measuring instruments and specialised tools.

Built primarily for the food industry the unit is manufactured from medical grade 316 stainless steel, it is waterproof and glass safe and all parts are easily accessible for servicing. Utilising specialist disinfection lamps at the optimum UVC waveband ensures fast and effective disinfection*. At only 30 watts consumption it is cost effective and has low carbon footprint.

No UVC light is visible when the unit is closed and the unit switches off when in the open position for safety

**disinfection rates depend upon various criteria such as tool cleanliness, time and temperature*
